Art Unit: 3731

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 22 and 23, drawn to a catheter system, classified in class 606, subclass 194.

II. Claim 24, drawn to a method of filtering, classified in class 128, subclass 898.

III. Claims 25-27, drawn to a filter, classified in class 606, subclass 200.

IV. Claims 28-32, drawn to a method of fabricating a vascular filter, classified in class 76, subclass 1.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process. For example, the catheter could be fixed to the guide wire so that they would be inserted as a fixed unit into the blood vessel instead of running the catheter over the guide wire as defined in claim 24.

Art Unit: 3731

4. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 22 does not include the specific braid structure defined in claim 25. The subcombination has separate utility such as being used without the catheter defined in claim 22.

5. Inventions I and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, that the product as claimed can be made by another and materially different process. For example, it could be made without using a mandrel as defined in claim 28.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3731

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (703) 308-2981. The examiner can normally be reached Monday to Friday.
